The Private Care Center (PCC) provides comprehensive skilled services and compassionate care to help patients recover and function as independently as possible in their own homes, surrounded by family and friends. This service could start while the patient is in the hospital and continues at home.

The PCC is a program of Saint George Hospital University Medical Center. It provides skilled, rehabilitative, therapeutic and personal home health care services to patients of all ages. It offers personalized home care services to individuals who may need this kind of helping hand. Beneficiaries range from babysitting to healthy elderly covering the chronically ill, disabled, injured or patients recovering from surgery.

Our Mission is to

1. Improve the health and well being of our patients through the provision of high quality, cost-effective health care services and products
2. Support people to live in and be part of their communities

We believe in a working partnership between patients, physicians and families to discuss health issues and support corresponding needs in order to determine the best course of action to be taken.

Our Private Care Advantages

Our services can help avoid unnecessary hospitalization, shorten hospital stay, and enable an individual to stay at home during illness.

Our Home Care Services

As part of Saint George Hospital University Medical Center, the PCC offers a complete range of home care services and medical equipment to meet the needs of our clients.

Call the PCC if you or a loved one need any of the following services at home:

1. Skilled Nursing Care including planning and monitoring of care
2. Nursing Aid Care including assistance with Personal Care and daily companionship
3. Babysitting
4. Physical and Respiratory Therapy
5. Medical Supplies and Equipment
6. Diagnostic Testing (Laboratory, Electrocardiogram, Pulse Oxymetry)
7. Transfers for medical appointments for those who can't manage on their own

Our Specialized Programs

1. Adult and Geriatric Care
2. Maternal and Child Care
3. Pediatric Care
4. Disease Management
5. Wound/Ostomy Care
6. Infusion Therapy
7. Injection Management
8. Enteral Nutrition
